JORDAN WILLIAMS

Melbourne, VIC, AU: Senior Software Engineer
| Backend | Distributed Systems | Voice AI | LLMs | AWS |

SUMMARY

Senior Software Engineer with a proven track record designing, shipping and maintaining production ready and scaleable solutions: real-time voice AI agents, medically certified software, transcription (STT) evaluation corpus and LLM based backend services. Specialist areas spanning: microservices, distributed systems, AI-powered products and medically certified software.
Strong background leading teams working in Python, AWS, event-driven architectures, microservices and LLM/voice AI systems.

PROFESSIONAL EXPERIENCE

Contact Harald, Melbourne, AU

SENIOR SOFTWARE ENGINEER - 09/2025 - 09/2026.

- Migrated bespoke LiveKit/Pipecat voice pipeline to VAPI. Improving scalability and reducing operational complexity.
- Owned backend and voice platform across real-time, asynchronous voice AI systems.
- Built STT evaluation tooling covering accuracy and latency; improved short-utterance handling by 15% and registration transcription by 25%.
- Reduced monthly ongoing infrastructure (AWS) baseline costs by 60% through identifying and eliminating unnecessary resource usage.
- Reduced client onboarding toil and introduced engineering/process improvements across the team.
- Built, tested and deployed real-time automotive voice agent in VAPI (<200ms latency).

daisee, Melbourne, AU

SENIOR SOFTWARE ENGINEER - 03/2023 - 08/2025.

- Reduced technical debt by 40%. Improved client onboarding times by 50%.
- Spearheaded a unified, microservice architecture, scalable data ingestion.
- Led and mentored teams of up to 5 engineers undertaking internships.
- Implemented an AI LLM based service for phone-call scoring and summarisation.
- Wrote tooling enabling internal stakeholders to self-serve. Toil reduction: 60%.
- Added observability and telemetry throughout tech-stack. Improved response times.
- Championed: code quality, unit testing and a cultural shift of cross-team dynamics.
- Key skills: Event Driven Systems, Instructor, LiteLLM, AWS, IaC (Terraform),

Coder Academy, Remote, Melbourne, AU

ACADEMIC MENTOR FULL-STACK BOOTCAMP - 10/2022 - 03/2023.

- Managed web development lessons and supported 40 students per cohort.
- Key skills: education, teaching, mentoring, curriculum design.

Mimi Hearing Technologies, Berlin, DE

AUDIO RESEARCH ENGINEER - 10/2018 - 11/2021.

- Owned and delivered medically certified software: hearing testing (PTT, MT), result computation. 5+ software projects owened across backend and research teams.
- Focus areas: MIR, speech intelligibility, subjective preference studies, user A/B testing, ML model advancement, clinical and safety considerations (EU MDD to MRD).
- Desinged, setup and delivered audio output QA pipeline.
- Communication bridge between research, product and business development teams.
- Key skills: Python, C++, data-science/analytics, machine learning, audio engineering.

ReDI School of Design Interaction, Berlin, DE

VOLUNTEER TEACHER, INTRO TO PYTHON, 07/2020 - 02/2021.

- Taught a diverse range of students within the school, over 95 nationalities.
- Adapted approach, communication and teaching style to meet students' needs.
- Planned, taught and coordinated: 4 hours of lessons per week.

EDUCATION

University of Southampton, UK

MASTERS OF ACOUSTICAL ENGINEERING (MENG) - FIRST CLASS HONOURS
09/2014 - 06/2018.

- Graduated Valedictorian/best in final year.
- Dissertation won the "Institution Best Project Certificate" from the IMechE.

SKILLS

Languages:

- Core: Python, TypeScript, C++.
- Capable of rapidly adapting to other languages, frameworks and tech-stacks.

AI:

- LiteLLM, Instructor, LLMs, GenAI, agentic systems, Voice AI, STT/TTS, Deepgram, VAPI, Soniox, LiveKit, Pipecat.

Backend:

- FastAPI, FastMCP, Django, Node.js, MERN, Flask, event-driven systems, microservices.

Cloud:

- AWS, Terraform, ECS, Lambda, RDS, CloudWatch.

Data:

- PostgreSQL, MongoDB, ingestion pipelines.

Engineering:

- CI/CD, telemetry, observability, testing, system design.

Engineering and Technical Leadership:

- System design and system architecture.
- Technical ownership and team leadership.
- Cross-functional communication.
- Pragmatic problem solving.
- Rapidly adaptable to new technologies.
- Event-driven architecture.
- Microservice system design focussing on scalibility and reliability.
- Infrastructure-as-Code, CI/CD, Telemetry, monitoring and observability

VOLUNTEERING

VARIOUS ROLES/ORGANIZATIONS.
JAN 2022 - CURRENT.

- Regular volunteer for multiple causes.
- Music in Exile | Sea Shepherd | Welcome Merchant.
- Reaching Out In The Inner West.
- Divers Den, Frankland Islands and Reef Restoration Foundation, Cairns, AU
- More information available on request.
